chandra Bhusan Kumar Yadav

Student at Jain (Deemed-to-be University)

Bengaluru, Karnataka, India

Summary

I'm a versatile developer with a rich background in mobile app development, frontend and backend development, and database management. With expertise in Java, Spring Boot, and React Native, I build robust and dynamic applications that deliver seamless user experiences.

While I have skills in video editing and designing, with proficiency in Canva, I prefer more my researching and analyzing skills than all these above mentioned skills which helps me to do any types of work in software field. Thank You!
