ChandraAI

Technologies

React Native, Spring Boot (Java), MySQL

Deployment Platform

ReactJS, CSS, NodeJS, MongoDB, ChandraServer, AI/ML, Ollama, Netlify

Purpose

To build an AI chatbot using a trained Ollama model to generate intelligent responses for user queries.

Key Features

• Account Management System that creates a unique account for each user.

• Login, Signup, and Logout pages with secure authentication for user session management.

• Responsive design fully compatible with both laptop and mobile screen sizes.

• Chat history storage allowing users to view and retrieve past conversations anytime.

• AI-based response generation using the 1.5B TinyOllama model to provide replies to user queries.
